

SPENO INTERNATIONAL SA

What we do for CO₂ reduction

- Installed a heat-pump in the office
- Stimulate the use of public transport for commuter travel
- Select a car that is economic on fuel
- Reduce travel distance between jobs
- Investigate the use of electric trains more regularly

Also in 2019 has SPENO International been working on composing the CO₂ footprint with the aim to reduce it. The reduction is realised with help of the reduction system in accordance with the CO₂ Performance Ladder 3.1. The components insight, reduction, communication and initiatives are part of this system.

| Objective | Our emission is equal to: | What can you do? | Initiatives |
|---|--|--|---|
| <p>SPENO International wants to reduce their CO₂ emissions by 22,5% in 2021 compared to 2012</p> | <p> Gas and electricity consumption for 3.635 households for one year</p> <p> Driving 2.172 rounds around the earth</p> <p> 9.800 retour flights to New York</p> <p> Letting 847.175 trees grow for one year</p> | <ol style="list-style-type: none"> 1 Drive/Ride CO₂ consciously 2 Check your tire pressure regularly 3 Work paperless as much as possible 4 Use public transport for commuter travel as much as possible 5 Do you have more ideas on how to reduce emissions? Let us know! | <p>SPENO International participates in the G21 Swisstainability forum. Its aim is to encourage meetings and collaborations between scientific, economic and political actors and NGOs, to support companies with innovating and sustainable project and to showcase the best initiatives and innovations.</p> |
