

SPENO INTERNATIONAL SA

Total emissions 2022-1
9.809 ton CO₂

This is approximately 6,5% less than 2021-1

Scope 1: 9.455 ton
Scope 2: 0 ton
Business travel: 354 ton

What we do for CO₂ reduction

- We promote using the train instead of airplanes
- We work in a gas free office and only use green electricity
- We only purchase energy efficient hardware
- We limit the maximum use of the engine and minimize the time to warm up the motor
- When available we purchase electrical hand tools
- We investigate the use of electric trains regularly

Since 2019 SPENO International has been working on composing the CO₂ footprint with the aim to reduce it. The reduction is realised with help of the reduction system in accordance with the CO₂ Performance Ladder 3.1. The components insight, reduction, communication and initiatives are part of this system.

Objective

SPENO International wants to reduce their CO₂ emissions by 15% in 2025 compared to 2019 (goal linked to ground km's finished)

Our emission is equal to:

Gas and electricity consumption for 2.021 households for 1 year

Driving 1.271 rounds around the earth

By reducing our airtravel we saved 1.895 retour flights in 2021...

and could let 147.600 trees grow for one year

What can you do?

- 1 Eat locally grown food and start with a meatless monday
- 2 Bring your own bags to the supermarket
- 3 Educate yourself by watching documentaries or reading articles
- 4 Buy second hand clothes more often

Initiatives

SPENO International participates in the G21 Swisstainability forum. Its aim is to encourage meetings and collaborations between scientific, economic and political actors and NGOs, to support companies with innovating and sustainable project and to showcase the best initiatives and innovations.
