

CO₂ footprint (tonnes) 2022

Total emissions 2022
19.759 ton CO₂

This is approximately
6% less than 2021

Scope 1: 18.977 ton
Scope 2: 0 ton
Business travel: 782 ton

What we do for CO₂ reduction

- We work in a gas free office and only use green electricity
- Limit maximum use of the engine - minimize time to warm up the motor
- We only purchase energy efficient hardware
- Optimize planning of train relocation, to reduce train passes and putting old trains out of order
- When available we purchase electrical hand tools
- We investigate the use of electric trains regularly

Since 2019 SPENO International has been working on composing the CO₂ footprint with the aim to reduce it. The reduction is realised with help of the reduction system in accordance with the CO₂Performance Ladder 3.1. The components insight, reduction, communication and initiatives are part of this system.

Objective:	Our emission is equal to:		What can you do?	Initiatives:
SPENO International wants to reduce their CO2 emissions by 15% in 2025 compared to 2019 (goal linked to ground km's finished)	 Gas and electricity consumption for 4.071 households for 1 year	 10.724 round trips to New York	 Eat locally grown food and start with a meatless monday	SPENO International is a member of Nederland CO2 Neutraal and participated at the "Occupational health: a key issue for sustainable development", organized by the Geneva Work Inspection Office
	 Driving 2.559 rounds around the earth	 Grow 987.950 trees for an entire year	 Turn off equipment when you don't need it or when you leave the room	
	 Do you have more ideas on how SPENO International should reduce emissions? Mail to yamine.guettari@speno.ch		 We promote using the train instead of airplanes
