

CO₂ footprint (tonnes) 2022

Total emissions 2022
19.759 ton CO₂

Electricity consumption
increased with 4% in 2022
compared to 2019.

Scope 1: 18.977 ton

Scope 2: 0 ton

Business travel: 782 ton

CO₂-PRESTATIELADDER

What we do for CO₂ reduction

- We work in a gas free office and only use green electricity
- Limit maximum use of the engine - minimize time to warm up the motor
- We only purchase energy efficient hardware
- Optimize planning of train relocation, to reduce train passes and putting old trains out of order
- When available we purchase electrical hand tools
- We investigate the use of electric trains regularly

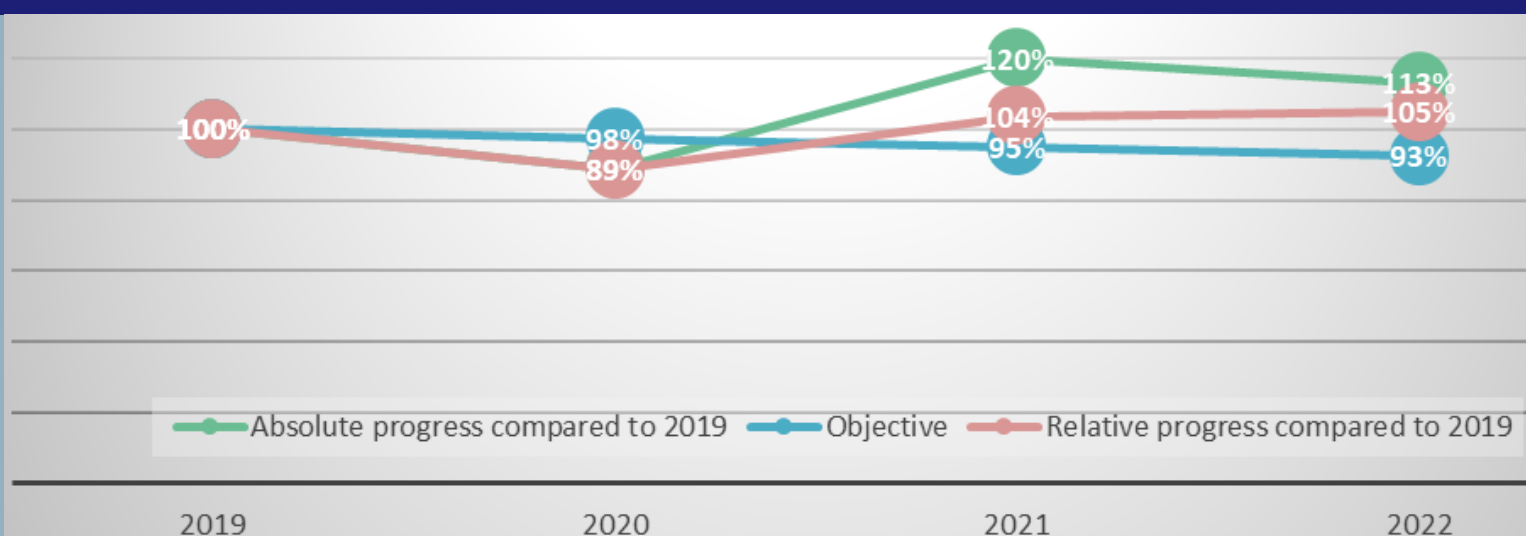

Since 2019 SPENO International has been working on composing the CO₂ footprint with the aim to reduce it. The reduction is realised with help of the reduction system in accordance with the CO₂Performance Ladder 3.1. The components insight, reduction, communication and initiatives are part of this system.

Objective:

SPENO International wants to reduce their CO₂ emissions by 15% in 2025 compared to 2019 (goal linked to kilometers driven)

Progress:

What can you do?

Do you have more ideas on how SPENO International should reduce emissions?

Mail to:

yamine.guettari@speno.ch

Initiatives:

SPENO International is a member of Nederland CO₂ Neutraal and participated at the "Occupational health: a key issue for sustainable development", organized by the Geneva Work Inspection Office
